TECHNICAL SKILLS

Languages: Python, JavaScript, HTML/CSS
Frameworks & Libraries: Django, FastAPI, React/Next.js
Databases: MongoDB, MySQL
Developer Tools: Git, Linux/Ubuntu, GitHub

EXPERIENCE

- System Engineer** Oct. 2025 – May 2026
PlanTech Engineering Services Kolkata, India
 - Evaluated core technology stacks and architected technical roadmaps to drive software execution and system scalability
 - Coordinated engineering workflows, facilitating daily syncs and managing technical documentation to ensure project alignment
 - Translated business requirements into actionable software development plans, optimizing overall service delivery
- Katalyse AI** Remote
Software Engineer Sep. 2025
 - Developed and maintained high-performance backend APIs using Python and FastAPI, improving data delivery and filtering of product related data
- Software Engineering Intern* Jun. 2025 – Sep. 2025
 - Assisted in full-stack development and data visualization workflows utilizing Looker Studio
 - Configured and optimized e-commerce integrations within Shopify to streamline business operations
- Junior Software Engineer** Oct. 2024 – May 2025
Kreative Chimp Remote
 - Engineered full-stack web applications utilizing Python/Django for backend services and React/JavaScript for responsive user interfaces
 - Implemented rigorous testing and debugging protocols across the application lifecycle to ensure system stability and bug-free deployments
 - Optimized codebase architecture and collaborated with engineering teams to significantly improve overall software performance and maintainability
- Junior Software Developer** Jul. 2024 – Oct. 2024
Cloud Express Solutions Remote
 - Developed and routed RESTful backend APIs using Python to efficiently structure and serve JSON data for client-side consumption
 - Engineered robust API endpoints to streamline data delivery, ensuring seamless client-server communication and backend reliability

PROJECTS

- Apearenz Web Platform** | *Next.js, TypeScript, Docker, Nginx, Tailwind CSS* Mar. 2026
 - Architected a high-performance single-page web application for a corporate client utilizing Next.js and TypeScript
 - Containerized the application utilizing Docker and pnpm for optimized build pipelines, and configured Nginx for secure domain routing
 - Engineered a scalable, custom user interface leveraging Tailwind CSS and advanced React libraries to meet strict client specifications
- Sunrise Virtual Selfie System** | *HTML, CSS, JS, Dezgo, Firebase, Claude AI* Sep. 2025
 - Developed a responsive, web-based virtual photo booth application enabling remote users to generate and download customized, interactive images
 - Implemented automated image framing and processing logic to ensure instant, high-quality rendering across various mobile and desktop devices

- Designed an accessible, user-centric interface for a high-traffic community initiative, successfully delivering a scalable digital experience

Project Katalyse AI

Jun. 2025 – Sep. 2025

- Engineered a scalable, mobile-responsive e-commerce chat widget utilizing React.js, Redux, and Tailwind CSS, enabling seamless integration and theme customization across Shopify storefronts
- Developed and optimized backend APIs to power dynamic widget features, including chat-based purchasing, advanced product filtering, and algorithmic recommendation engines
- Configured Google Analytics and designed Looker Studio dashboards to visualize critical e-commerce metrics, tracking user interactions, conversion rates, and product performance

Dhanwise Fintech Platform | Next.js, TypeScript, Tailwind CSS

Apr. 2025

- Engineered a high-performance single-page application (SPA) for a financial technology platform connecting users with verified advisors
- Architected a scalable and strictly typed frontend infrastructure utilizing Next.js and TypeScript to ensure long-term maintainability
- Designed responsive, user-centric interfaces leveraging Tailwind CSS to deliver an optimized, cross-device experience

Sri Ramanujavani Web Application | Python, Django, JavaScript, Apache2, Ubuntu

Nov. 2024 – Dec. 2024

- Developed a full-stack web application utilizing Python and Django, implementing robust CRUD operations for dynamic content management
- Engineered a secure, interactive administrative dashboard using JavaScript to streamline data entry and platform operations
- Configured and deployed the production environment on an Ubuntu server utilizing Apache2, ensuring optimal system stability and uptime

EDUCATION

Manipal University Jaipur

Online

Master of Computer Applications (MCA)

Ongoing

Bharatiya Vidya Bhavan Institute of Management Science

Kolkata, India

Bachelor of Business Administration (BBA) | CGPA: 8.13

Aug. 2021 – Jun. 2024
